

Ideation Phase

Define the Problem Statement

Date	08 October 2022
Team ID	PNT2022TMID17876
Project Name	Project – Predicting the energy output of wind turbine based on weather condition
Maximum Marks	2 Marks

Problem statement-1

Problem statement -2

Problem Statement	I am	I'm trying to	But	Because	Which makes me feel
PS-1	Employee from Power station	Predict the energy output power generated.	It is difficult to predict	Not having knowledge about determining power based on weather	Exploits overcost production on other energy sources.
PS-2	a student	determine energy power output generated based on weather.	the energy output varies hourly	the weather condition are not stable	doubted to choose the best model.
